**PRINT WORKS CHEMICAL TIP:**

Many press users don't wash up the press at the end of the day. This permits dust and dirt to accumulate in the inking system and invites many problems. It's not good roller care either.

If it is policy not to wash up at night, it is advisable to give the press a good cleaning on Friday. Wash the ink off your rollers with a good wash like X75-122 and X75-123. Once the ink has been removed apply a good deglazer like X75-111, and rinse with X75-123. Your press rollers will be clean and can rest over the weekend.

Good housekeeping pays off in better production and higher quality with less down time and fewer service calls. Ink and water balance is easier to maintain if the rollers are free of glaze. Hickeys are less of a problem because dried ink particles and dirt do not accumulate in the inking system.
