

SILICONE

Unigraph is delighted to announce that, after years of research in conjunction with print shops, our laboratory has developed a series of revolutionary new products including silicone concentrates, silicone anti-marking emulsions and Uni Enviro S.A. (slipping agents). These products are economical because they are designed to support outstanding print quality at high levels of dilution, allowing your print shop to enjoy big savings over the competition.

COLDSET NEWSPAPER WEB PRESSES

- CODE 710 UNI SILICONE 60 %**
This is a pure premium 60 % emulsion silicone which gives a maximum silicone concentration.
- CODE 711 UNI SILICONE 60AHC**
This 60 % silicone emulsion contains humectant and conductivity additive to monitor concentration. It also contains anti-stat to prevent static electricity.
- CODE 712 UNI SILICONE 50AHC**
This 50 % silicone emulsion gives you the same results as 60 % solution but at lower concentration.
- CODE 713 UNI SILICONE 30AH**
This 30 % silicone emulsion contains humectant and built in anti-stat.
- CODE 714 UNI SILICONE 20AH**
This 20 % silicone emulsion gives you the same results as 30 % solution but at lower concentration.
- CODE 720 UNI SILICONE ANTI-MARKING ÉMULSION 60A**
This 60 % emulsion formula is made of silicone, moisturizing agents, anti-stat and trade secret materials. No additives required. Economical.
- CODE 721 UNI SILICONE ANTI-MARKING ÉMULSION 60AHC**
This 60 % emulsion formula is made of silicone, humectant, moisturizing agents, trade secret materials and conductivity additive to monitor concentration. No additives required.
- CODE 722 UNI SILICONE ANTI-MARKING ÉMULSION 50AHC**
This 50 % emulsion formula gives you the same results as 60 % solution but at lower concentration.
- CODE 723 UNI SILICONE ANTI-MARKING ÉMULSION 40AH**
This 40 % emulsion formula is made of silicone, anti-stat, humectant and trade secret materials. No additive required.
- CODE 730 UNI ENVIRO S.A. 60 %**
A 60 % slipping agent for Web presses.
- CODE 733 UNI ENVIRO S.A. 35 %**
A 35 % slipping agent for Web presses.
- CODE 740 UNI ANTI-STATIC 740**
This premium anti-static formula is compatible with all Unigraph silicone emulsions. 1-to-3 ounces per gallon of diluted silicone emulsion will eliminate static in most difficult conditions.
